

Maths Support Group Course

MATHS COURSE

This maths course is ideal for students who would like to develop their maths skills and build confidence in the subject. It also caters to the needs of students who are struggling to access the pace of lessons at school due to dyscalculia or maths anxiety.

Maths Support Course

Years 3-4 or Years 5-6

DYSCALCULIA FRIENDLY

SMALL GROUP COURSE (Term-Time)

- Live (Zoom)
- Small group learning (max of 6)

With a focus on reinforcing the foundations of maths, as a group we explore the fundamentals of maths using dyscalculia-friendly methods and practise the essential sight facts.

I aim to instil a love of learning for maths through this course.

Finer Details

We will use dyscalculic teaching methods and resources so that all learners can access the content of the lessons.

The key focus is on number facts acquisition, developing recall speed, building links between areas of maths and reducing anxiety around maths learning.

We will use Cuisenaire rods regularly throughout the course and so purchasing a small set would be recommended to fully engage with the learning. These can be purchased from the [Cuisenaire website](#) or from Amazon. The 'Mini' set is more than sufficient.

Dates and Times

Term-time via Zoom:

Tuesdays 4pm-5pm (Years 3-4)

Thursdays 6.15pm - 7.15pm (Years 5-6)

My courses are delivered in a nurturing manner, allowing time for discussion. I gradually build on skills and gently introduce new learning at an appropriate stage of the course.

Feel free to contact me if you have any questions about the courses.
